Kim Jong Un, general secretary of the Workers' Party of Korea and president of the State Affairs of the Democratic People's Republic of Korea

金 正 恩

A year, compared with the 5 000-year history of the Korean nation, is short like a flash of lightning.

In the year 2022, however, the Democratic People's Republic of Korea made a fresh advance towards a great, powerful country while building up unprecedentedly great national strength and demonstrating immense prestige and honour to the world. It is certain that such success has not come of its own accord with the lapse of time.

The Korean people, who turned out in the struggle to accomplish the ambitious objectives advanced at the Fourth Plenary Meeting of the Eighth Central Committee of the Workers' Party of Korea, encountered the harshest-ever trials—reckless manoeuvres of the hostile forces to stifle the DPRK, the unexpected epidemic crisis and severe natural calamities.

In the rapidly changing situation Kim Jong Un, general secretary of the WPK, convened such Party and state meetings and sectoral meetings as the Fifth Plenary Meeting of the Eighth Central Committee of the WPK and the Seventh Session of the 14th Supreme People's Assembly of the DPRK at opportune times to put forward practical programmes for developing the Party and achieving prosperity of the country and led the efforts for their implementation.

All through the year Kim Jong Un made devoted efforts to spearhead the campaign for defending national sovereignty and the people and for creation. His energetic revolutionary leadership brought about noteworthy events in the history of the country in succession by increasing the power of the country and accelerating its advance.

Principled programmes for enhancing the leadership role of the Party in every possible way, including the orientation of Party building in the new era, were put forth and thus a golden age was opened up in strengthening the whole Party.

The single-hearted unity of all the Korean people around the Party wiped out in a little over 90 days the malignant virus that made inroads into their territory and thereby the DPRK won a great victory in the anti-epidemic war, a triumph that would be specially recorded in the world history of public health.

Juche Korea boosted its prestige by celebrating the greatest national holidays and other national anniversaries as grand political festivals.

It pressed ahead with the construction of dwelling houses in the capital city of Pyongyang, opened up a new era of rural development and provided models for the modernization of the local industry to translate the people's dreams and ideals into reality.

The adoption of the law "On the DPRK's policy on the nuclear forces" provided a guarantee for the country's eternal security, and the most powerful national defence capabilities were consolidated for the security and future of the country and people.

Thanks to the noble sense of moral obligation of the General Secretary, the revolutionary seniors added brilliance to their lives, and thanks to his affection for the rising generations, the children's laughter reverberated more loudly throughout the country.

In this course, the single-minded unity was further consolidated as the most powerful strength of the DPRK and the whole country formed a great, harmonious family brimming over with warm feelings.

In a word, 2022 for the DPRK was a year when epochal events took place even in the face of extreme difficulties thanks to Kim Jong Un's extraordinary political ability and sincere devotion for the people, and when the spirit of the DPRK that grows stronger and advances steadily even in harsh trials was clearly demonstrated.

Leading Anti-epidemic War to Victory

The DPRK maintained a stable epidemic prevention situation for more than two years in the face of the global public health crisis, but COVID-19 entered its territory, constituting the most serious state emergency.

To cope with the crisis, it put into operation the highest-level emergency anti-epidemic system on May 12, 2022, eliminated the malignant virus a little over 90 days after that and restored stability and peace in its territory.

In those days, General Secretary Kim Jong Un convened major meetings of the WPK successively to put forward people-oriented and scientific anti-epidemic measures and methods and spearheaded the anti-epidemic war.

He ensured that the country was switched over to the highest-level emergency anti-epidemic system, and took measures for supplying medicines to all the fever cases across the country and providing daily necessities to the people. And he set forth the tasks of building a national anti-epidemic capacity simultaneously so that the people could be provided with a dependable anti-epidemic environment in the face of any public health crisis.

As a result, a strict anti-epidemic system and discipline was established in the country and anti-epidemic policies were accurately executed. The Korean people unconditionally supported the measures adopted by the state and rose up, rallying around the WPK more closely.

In the days of leading the anti-epidemic campaign, Kim Jong Un offered to donate official medicines prepared by his family to families in difficult conditions early in the morning and visited, risking his health, pharmacies in the capital city late at night straight after a consultative meeting of the Political Bureau of the WPK Central Committee to acquaint himself with the state of the supply of medicines to the citizens.

The days when the leader and the people shared the same destiny were a period which proved the truth that any disaster, however serious it might be, could not harm the leader and the people who are united with ties of affection and with one ideology and purpose.

Eighth Political Bureau Meeting of Eighth Central Committee of WPK Held May 12, 2022

He then repeatedly expressed his determination and will to win a great victory in the anti-epidemic campaign without fail.

He said that he was donating officinal medicines prepared by his family to the Headquarters Committee of the WPK with his resolution to always share destiny with the people and with a fervent hope that peace and laughter would settle again in all families across the country as early as possible, and suggested that the medicines be sent to families in need.

For Safeguarding National Sovereignty and Peace

In 2022, the DPRK made positive efforts to foil the growing military frenzy of the enemy and safeguard the country's sovereignty and peace, resulting in significant successes.

These are the fruits produced by the outstanding military idea, energetic leadership and matchless courage and grit of the respected Comrade Kim Jong Un.

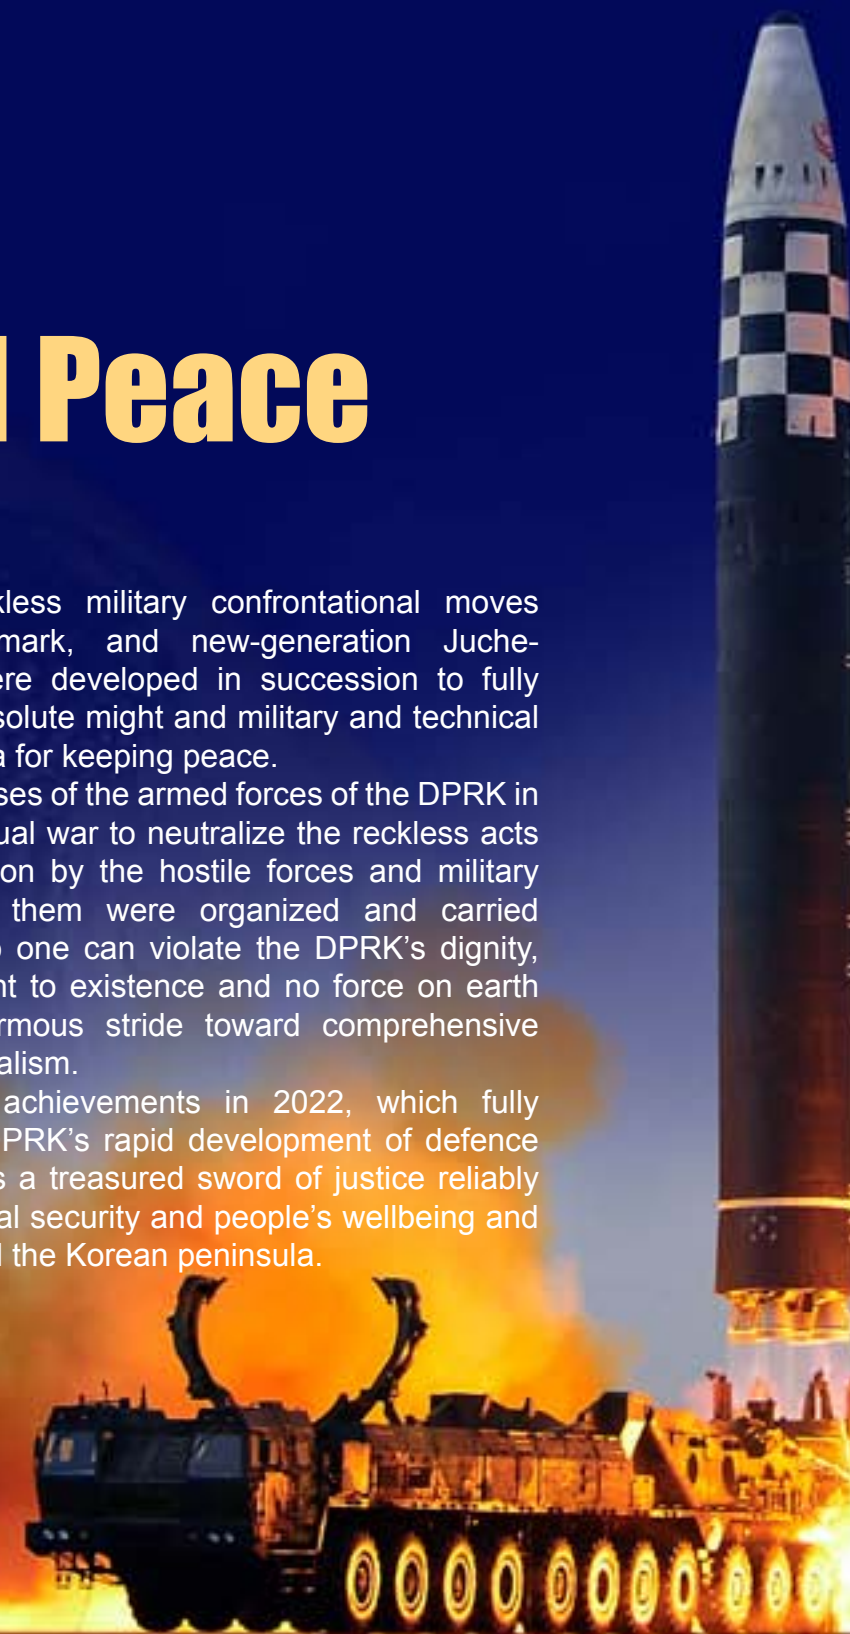

He left footprints of his energetic leadership in the Party and state meetings where he defined the strategic goals to be attained by the munitions industry and on the military training grounds clouded with powder smoke and exceedingly dangerous frontline to which he came out and gave detailed guidance.

Thanks to his devotion and untiring efforts, a political event of officially legalizing the nuclear forces policy of the DPRK was unfolded, a new-type ICBM Hwasongpho-17 was launched by reflecting the WPK's invariable will against the enemy under the situation where the US and other

hostile forces' reckless military confrontational moves overstepped the mark, and new-generation Juche-based weapons were developed in succession to fully demonstrate the absolute might and military and technical edge of Juche Korea for keeping peace.

And military exercises of the armed forces of the DPRK in simulation of an actual war to neutralize the reckless acts of military provocation by the hostile forces and military operations against them were organized and carried out to show that no one can violate the DPRK's dignity, sovereignty and right to existence and no force on earth can check its enormous stride toward comprehensive development of socialism.

The momentous achievements in 2022, which fully demonstrated the DPRK's rapid development of defence capability, served as a treasured sword of justice reliably guaranteeing national security and people's wellbeing and peace in and around the Korean peninsula.

The units of the Korean People's Army for the operation of tactical nukes staged military exercises in order to check and assess the war deterrent and nuclear counterattack capability of the country and give the enemies a stern warning.

The US, in coalition with Japan and south Korea, staged dangerous military exercises in succession by mobilizing large-scale naval forces, including the aircraft carrier USS *Ronald Reagan* task force, in the waters off the Korean peninsula, further escalating the tension in the region while openly posing a military threat to the DPRK.

Under such unavoidable circumstances, the Central Military Commission of the WPK discussed the politico-military situation prevailing on the Korean peninsula and its prospects in the latter half of September and decided to organize military exercises under the simulation of an actual war at different levels in order to check and improve the reliability and combat power of the DPRK's war deterrent and send a strong military reaction warning to the enemies.

KPA Mounts Military Operations

Against US-south Korea Combined Air Drill Vigilant Storm

November 2-5, 2022

Vigilant Storm, the largest-ever US-south Korea combined air drill, was staged in south Korea from October 31 to November 5, 2022, with an involvement of hundreds of fighter jets of different missions including nuclear strategic bombers.

The large-scale combined air drill is, in fact, an open provocation aimed at intentionally escalating the tension in the region and a dangerous war game of very high aggressive nature directly targeting the DPRK.

In order to demonstrate the thoroughgoing and resolute will to counter the grave situation and the clear self-confidence in the military capabilities of the armed forces of the DPRK and to inspire the officers and men of the KPA, filled with resolute retaliatory will, with the conviction of sure victory, the General Staff of the KPA conducted military operations of counteraction from November 2 to 5.

Kim Jong Un Guides Test Fire of New-type ICBM of DPRK's Strategic Forces

November 18, 2022

The test fire of new-type ICBM of the DPRK's strategic forces was conducted under the intolerable condition that the reckless military confrontational moves of the US and other hostile forces persistently driving the military and political situation on the Korean peninsula to the red line have gone beyond the limit and hypocritical and brigandish sophisms have been justified even in the UN arena to brand the right of a sovereign state to self-defence as provocation in every way.

The test fire was aimed at checking the reliability of the weapon system and its operation.

The launched new-type ICBM Hwasongpho-17 travelled up to a maximum altitude of 6 040.9km and flew a distance of 999.2km for 4 135s before accurately landing on the pre-set area in open waters of the East Sea of Korea.

The test fire clearly proved the reliability of the new major strategic weapon system to be representative of the DPRK's strategic forces and its powerful combat performance as the strongest strategic weapon in the world.

Translating People's Dreams and Ideals into Reality

The respected Comrade Kim Jong Un devoted his all to translating the people's dreams and ideals into reality all the year round.

He started the huge campaign for creation with the field guidance tour of the designated place for the Ryonpho Greenhouse Farm, which would contribute to improving the dietary life of the people in South Hamgyong Province, braving the cold wind in January. In addition, he set the construction of the greenhouse farm as the most important policy construction task in 2022 and energetically guided the project.

He shovelled the first spadeful of earth for its ground-breaking and solved all problems arising in its construction from the formation of construction forces to the execution and supply of equipment and materials. Thanks to his leadership, a miracle was performed that the world's largest modern greenhouse vegetable production base was built in a matter of 230 odd days.

He made a stirring speech at the ground-breaking ceremony for the construction of 10 000 flats in the Hwasong area, and attended the inaugural ceremonies of Songhwa Street, the first entity of the construction project of 50 000 flats in Pyongyang set forth by the Eighth Congress of the WPK, and the Pothong Riverside Terraced Houses District to share joy with the owners of new houses, congratulating them on their house-moving.

He examined more than 1 000 layouts for the construction of Songhwa Street and over 240 plans for the construction of the Pothong Riverside Terraced Houses District in a little more than a month.

Signal successes heralding a new era of rural development were made across the country and a model of modernization of the local industry was provided in Kimhwa County. All these creations in 2022 are the products of Kim Jong Un's devoted efforts for the good of people.

**Kim Jong Un made a report on the first agenda item
“On review of the implementation of major Party and
state policies in 2022 and the work plan for 2023.”**

In the report he appreciated the successes made in 2022 when the Party and people had made steady and powerful progress while waging an arduous struggle in close unity, and set it as the general direction of new year’s work to further expand and develop the all-people struggle to open a new phase in socialist construction so as to provide a decisive guarantee for the fulfilment of the five-year plan.

In the sectoral workshops and consultative meetings for thoroughly implementing the vital tasks the General Secretary set forth in his historic report, there were intense debates to prepare the draft resolution for the plenary meeting of the Party Central Committee.

Kim Jong Un made a report on the fifth agenda item “On the five-point line of Party building in the new era”.

Expressing the belief that the WPK would be able to constantly maintain and strengthen its character and nature and discharge its sacred mission and responsibility for the people forever if the five-point orientation based on the theory of Party building in the new era is confirmed as the line of Party building of the WPK, the General Secretary courteously proposed to the plenary meeting to formally define the Party building orientation in the new era in which the will of the whole Party is integrated as the Party’s line.

A resolution on defining the five-point orientation based on the General Secretary’s unique idea and theory of Party building as the WPK’s line of Party building in the new era was adopted with unanimous approval.
